

Monitoring

- **Dashboards**

Navigation: Monitoring > Integrations > Dashboard

- a) To monitor the Runtime Health - instances being run with successful and failed instances
- b) To monitor System Health, Agent Health
- c) To monitor the Design Time metrics – no. of integrations, connections
- d) To monitor the Integrations – Active, their Nature, Scheduling information etc.

Monitoring

- **Integrations**

Navigation: Monitoring > Integrations > Integrations

- a) Shows how many instances of an Integration has run
- b) How many Processed, Succeeded, Errored, Aborted.
- c) Scheduled integrations can be submitted/ scheduled again from this window.

Monitor Integrations						
▶ Total Instance Count ⓘ						
🔍 ⚙️ 9 Integrations						
Time Window : Last 1 Hour Status : Active Sort By : Last Update						
Name	Received	Processed	Succeeded	Errored	Aborted	
 JournallImport (1.0) Last Message: Just now	1	1	1	0	0	

Monitoring

- **Agents**

Navigation: Monitoring > Integrations > Agents

- a) Helps monitoring Agent Groups and Agents registered under the Agent Group
- b) Shows Status of the agent group and agents

Monitor Agents

3 Agent Groups

Sort By : Last Update

Tue, Dec 15th, 2020 07:00:53 PM IST

Name	Type	Status	Agents
<div><div></div>SAMPLE_AGENT</div>	Connectivity Agents Group	<div><div></div>Available</div>	1
CA-192.168.0.5-1608038968277	Connectivity Agent	<div><div></div>Active</div>	

Monitoring

- **Tracking**

Navigation: Monitoring > Integrations > Tracking

- a) Helps tracking the instances run of an integration
- b) Shows the status, Instance Id, Duration the integration it has run for
- c) Run details of the instance run can be viewed too.

Track Instances				
Full or partial primary or secondary ...		1 Instance		Tue, Dec 15th, 2020 06:15:18 PM IST
Time Window : Last 1 Hour		Status : Succeeded	Integration : JournalImport (JOURNALIMPORT 01.00.0000)	
Primary Identifier	Instance Id	Status	Business Identifiers	Duration
start Time: 2020-12-15T12:23:59.633+00:00 JournalImport 1.0.0	400028	Succeeded		Received 22 minutes ago Succeeded 21 minutes ago Duration 34 seconds

Monitoring

- **View Errors**

Navigation: Monitoring > Integrations > Errors

- a) Can View specific error details for an integration instance.
- b) Error is presented in two modes:
 - i. Summarized for quick understanding.
 - ii. Detailed at the activity level within the integration

Errors

Only recoverable errors can be selected for Abort and Resubmit operations.

Search: 1 Error

Time Window: Last 1 Hour

Track Errors (dropdown menu)

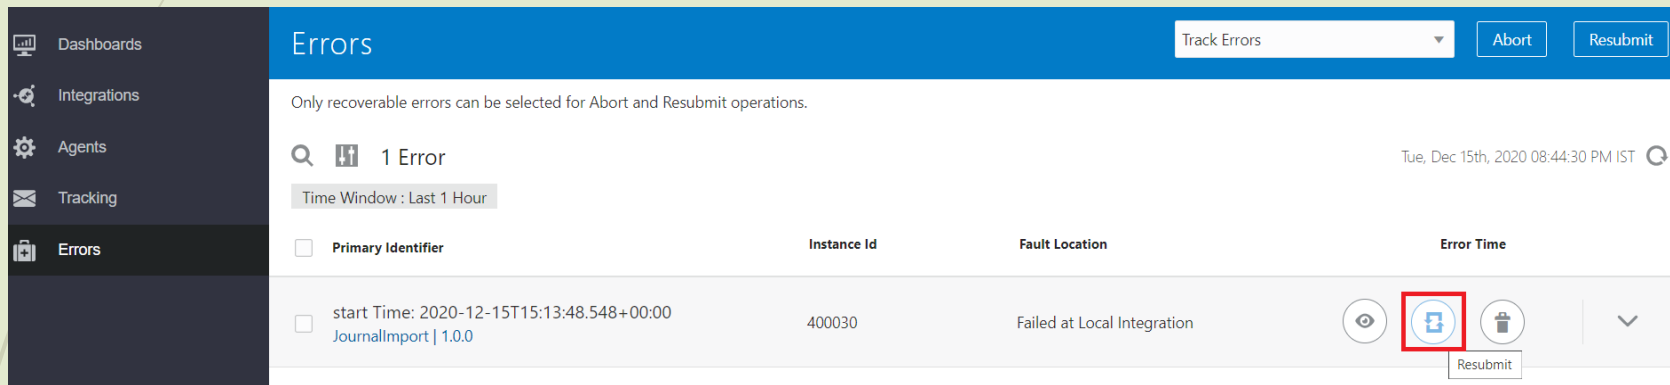

Primary Identifier	Instance Id	Fault Location	Error Time
<input type="checkbox"/> start Time: 2020-12-15T15:13:48.548+00:00 JournalImport 1.0.0	400030	Failed at Local Integration	Dec 15th, 2020 08:44:04 PM IST

Monitoring

- **Resubmit a Failed Integration**

A failed integration can be resubmitted manually.

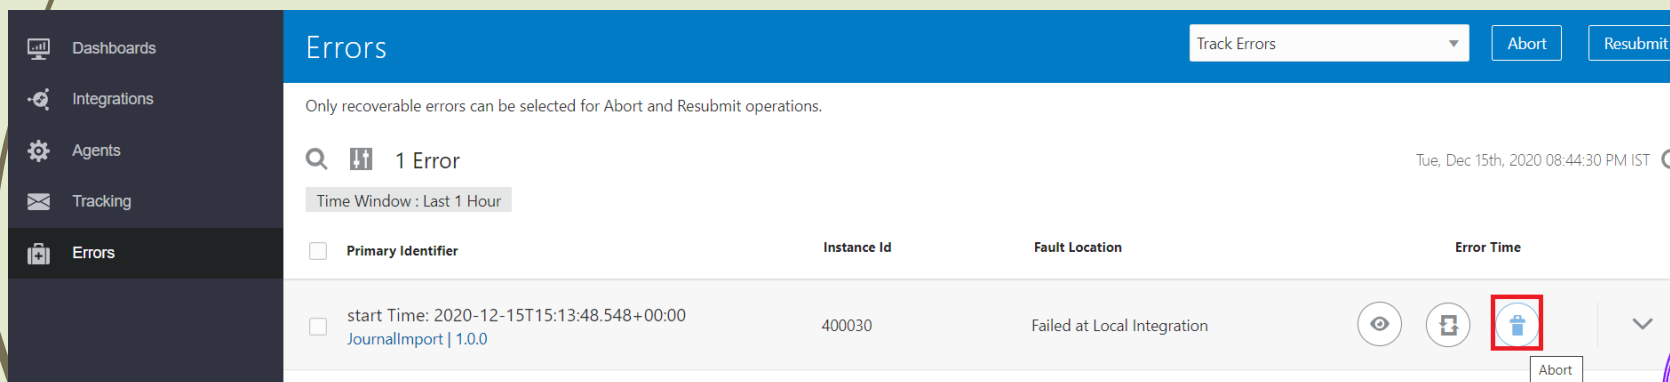

The screenshot shows the 'Errors' section of a monitoring dashboard. The left sidebar contains links for Dashboards, Integrations, Agents, Tracking, and Errors. The main content area has a blue header with 'Errors', a 'Track Errors' dropdown, and 'Abort' and 'Resubmit' buttons. Below the header, a message states: 'Only recoverable errors can be selected for Abort and Resubmit operations.' A search bar shows '1 Error' and a 'Time Window : Last 1 Hour' filter. A table lists error details:

<input type="checkbox"/>	Primary Identifier	Instance Id	Fault Location	Error Time
<input type="checkbox"/>	start Time: 2020-12-15T15:13:48.548+00:00 JournallImport 1.0.0	400030	Failed at Local Integration	<div><div></div><div></div><div></div><div></div></div> <div>Resubmit</div>

- **Abort a Failed Integration**

A failed integration can be aborted manually too.

This screenshot is identical to the one above, showing the 'Errors' section of the monitoring dashboard. In this instance, the 'Abort' button in the action column of the error table is highlighted with a red box.

Monitoring

- **Bulk Resubmit/ Bulk Abort all Failed Integrations**

All the failed instances can be resubmitted or aborted in bulk.

Errors

Track Errors

Abort

Resubmit

Only recoverable errors can be selected for Abort and Resubmit operations.
