

Library in OIC

- Use Case: **Derive the String Length using Javascript Library**
- Integration Style: App Driven Orchestration
- Connections to be created/ used:
 - REST Connection with role as Trigger

- Library (Javascript Function):

```
function getStringLength ( param){  
    var result = param.length;  
    return result;  
}
```

- Integration will look like:
 1. REST Connection will be triggered to take a String as input
 2. Invoke the Javascript Library to derive the length of the string
 3. Return the length calculated #2 as response
