

How to connect to ATP Database from OIC

- Use Case – **Insert Data into a table in ATP Database**
- Integration Style: App Driven Orchestration
- Connections to be created/ used
 - Oracle ATP
 - REST
- Integration will look like:
 1. REST Connection (Trigger) will take input of Log data.
 2. Oracle ATP Connection (Invoke) will be used to insert data into error log table of ATP Database
 3. Once inserted, status will be sent back to caller/ invoker.
