

# Inbound Integration to Fusion using Oracle Cloud ERP Connection(SOAP)

# Inbound Integration to Fusion using Oracle Cloud ERP Connection(SOAP)

- Use Case – **Import Suppliers**
- Integration Style: App Driven Orchestration
- Connections to be created/ used
  - Oracle Cloud ERP (SOAP Based Service)
  - File
  - Oracle Database
- Integration will look like:
  1. Poll Supplier data file from file system which is behind the firewall or not exposed to internet (local file system) using File Connection (Agent Based)
  2. Invoke Supplier SOAP Service using Oracle ERP Cloud connection to send request to import supplier
  3. Response being received(Supplier imported successfully in cloud) will be stored in a Database table which is behind the firewall or not exposed to internet using Oracle Database Connection(Agent Based)
