

Inbound Integration to Fusion using Oracle Cloud ERP Connection(REST)

Inbound Integration to Fusion using Oracle Cloud ERP Connection(REST)

- Use Case – **Import Standard Cash Receipts**
- Integration Style: App Driven Orchestration
- Connections to be created/ used
 - Oracle Cloud ERP (REST Based Service)
 - REST
- Integration will look like:
 1. REST Connection (Trigger) will take input of Receipts data.
 2. Invoke Standards Receipts REST Service using Oracle ERP Cloud connection to send request to import standard Receipts
 3. Response being received (receipts imported successfully in cloud) will be sent back to caller/ invoker.
