

# Build HelloWorld SOAP Web Service with OIC

- Use Case – **Build HelloWorld SOAP Web Service with OIC**
  - Enter name, let's say **Raja** and the service will return **Hello Raja**
- Connections to be created/ used
  - SOAP Connection
- Integration will look like:
  1. Use SOAP Connection as Trigger which will take name (e.g. **Raja**) as input
  2. Next, Mapper will transform the name to return **Hello Raja**
  3. SOAP Connection will in turn return the response to the caller
