

Publish To OIC

- Use Case – **Enqueue Error Messages to Oracle Managed Topic at OIC**
- Integration Style: Publish To OIC
- Connections to be created/ used
 - REST
- Integration will look like:
 1. REST Connection will be used as Trigger to take error message as input
 2. Inbuilt IC Messaging Service Connection (In built with Publish To OIC integration style) will push the messages Oracle Managed Topic at OIC.

Subscribe To OIC

- Use Case – **Dequeue Error Messages from Oracle Managed Topic at OIC and push to Oracle DB**
- Integration Style: Subscribe To OIC
- Connections to be created/ used
 - Oracle Database
- Integration will look like:
 1. Inbuilt IC Messaging Service Connection (In built with SubscribeTo OIC integration style) will act as Trigger though it will subscribe to a particular Oracle Managed Topic at OIC (messages pushed by Integration with style Publish To OIC).
 2. Oracle Database connection will push data to database table
